

## CITY OF NEW BEDFORD

JONATHAN F. MITCHELL, MAYOR

September 15, 2016

City Council President Linda M. Morad and  
Honorable Members of the City Council  
City Hall, 133 William Street  
New Bedford, MA 02740

Dear Council President Morad and Honorable Members:

I am submitting for your consideration an Ordinance amending Chapter 6 of the New Bedford Code of Ordinances by the Addition of Article IX adopting the Stretch Code, 780 CMR Appendix 115.AA, to the 9<sup>th</sup> Edition Massachusetts Building Code.

Upon adopting the Stretch Code, the City will have satisfied the last of five criteria required to apply for the Commonwealth's "Green Communities" designation. The Green Communities Designation and Grant Program is an important source of state financial assistance for qualifying municipalities. As of today, there are 155 Massachusetts cities and towns designated as a Green Community and able to benefit from the program. We estimate that upon receiving the designation for New Bedford, we will be eligible for approximately \$500,000 in initial funding for a project or projects related to energy efficiency, renewable energy, or related initiatives. Moreover, acquiring the designation allows us to assume our rightful place among municipalities that are considered leaders in sustainability and resiliency statewide and nationally.

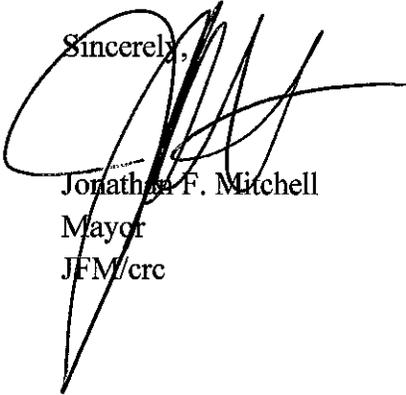

The City's Department of Inspectional Services and DPI Energy Office have determined that adoption of the Commonwealth's Stretch Code will have a negligible impact on the local building industry and on local economic activity for two important reasons:

1. As of January 1, 2017 both the Base Energy Code as well as the Stretch Energy Code will be updated, with the new Stretch Code incorporated into the new Base Code, eliminating the extensive separate language to describe it.
2. The updated Stretch Code will apply only to new commercial buildings over 100,000 square feet. However, smaller new commercial buildings or additions, renovation, and repairs to residential or commercial buildings will not be impacted by the updated Stretch code.

Enclosed for your information is a more detailed memorandum explaining the Green Communities Program, a detailed description of the components of the new Stretch Code, and a map and funding matrix of the 155 Green Communities designees from the Department of Energy Resources. Staff from the DPI Energy Office, Inspectional Services, and the State Department of Energy Resources will be on hand when the Council considers this measure and will be ready to address any questions that the Council may have.

Thank you for your consideration.

Sincerely,

A large, stylized handwritten signature in black ink, appearing to read 'JFM', is written over the word 'Sincerely,' and extends downwards into the typed name.

Jonathan F. Mitchell

Mayor

JFM/crc

# CITY OF NEW BEDFORD

In the Year Two Thousand and Sixteen

## AN ORDINANCE

Amending Chapter 6 of the New Bedford Code of Ordinances by the Addition of Article IX adopting the Stretch Code, 780 CMR Appendix 115.AA, to the 9<sup>th</sup> Edition Massachusetts Building Code, including any future editions of, amendments to or modifications of said appendix

31- 509

Be it ordained by the City Council of the City of New Bedford as follows:--

**SECTION 1.** Chapter 6 hereby is amended by inserting after Article XIII the following new Article IX entitled: Stretch Code, 780 CMR Appendix 115.AA.

### ARTICLE IX. - STRETCH CODE, 780 CMR APPENDIX 115.AA,

#### Sec. 152. – Purpose.

The purpose of the Stretch Energy Code is to provide a more energy efficient alternative to the Base Energy Code applicable to the relevant sections of the building code for both new construction and existing buildings.

The City of New Bedford's certification under the Massachusetts Green Community Act requires that the City adopt the Stretch Code which allows the city access to state grants for energy improvements and encourages the building of energy efficient homes and businesses and constitutes the final step required for the city to qualify for Green Community Status from the Commonwealth of Massachusetts

#### Sec. 153. – Definitions

- a. International Energy Conservation Code (IECC): The International Energy Conservation Code (IECC) is a building energy code created by the International Code Council. It is a model code adopted by many state and municipal governments in the United States for the establishment of minimum design and construction requirements for energy efficiency, and is updated on a three-year cycle. The baseline energy conservation requirements of the Massachusetts Building Code are the IECC with Massachusetts amendments, as approved by the Board of Building Regulations and Standards.

- b. **Stretch Energy Code:** The Stretch Energy Code is a Massachusetts building code based on further amendments to the International Energy Conservation Code (IECC) to improve the energy efficiency of buildings built to this code. The Stretch Energy Code was codified by the Board of Building Regulations and Standards as an appendix, 780 CMR Appendix 115.AA, to the 9<sup>th</sup> Edition Massachusetts Building Code. For the purposes of this definition, the Stretch Energy Code shall include any future editions of, amendments to, or modifications of said appendix.

**Section 154. – Applicability**

The Stretch Energy Code applies to residential and commercial buildings. Buildings not included in this scope shall comply with 780 CMR 13, 34, 51, as applicable.

**Section 155. – Stretch Energy Code**

The Stretch Energy Code hereby is incorporated, by reference, into the City of New Bedford Code of Ordinances.

**Section 156. – Enforcement**

The Stretch Energy Code shall be enforceable by the inspector of buildings.

**Section 157. - Enactment**

**Section 2.** This ordinance shall take effect in accordance with the provisions of Chapter 43 of the General Laws.

## **BACKGROUND:**

On July 2, 2008, Governor Patrick signed the Green Communities Act (the "Act"), which is a comprehensive piece of energy reform legislation promoting development of renewable energy, energy efficiency, "green communities," and implementation of the Regional Greenhouse Gas Initiative ("RGGI"). Following passage of the Green Communities Act in 2008, DOER launched the Green Communities Designation and Grant Program in 2009.

## **GREEN COMMUNITIES PROGRAM**

The Green Communities Designation and Grant Program (the Program) provides qualifying municipalities with financial and technical assistance. As of today, there are 155 MA cities and towns designated as a Green Community. As energy leaders in Massachusetts, these communities are eligible for competitive state grants. Nearly \$29 million from those Green Community grants is already at work in 136 communities, with more than \$3 million in additional grants for energy projects in the newest 19 designated communities on an array of energy activities: from reducing energy use in municipal and school buildings to establishing power purchase agreements that enable financially attractive renewable energy generation, adopting the latest building codes, and much more.

A map of the Green Communities and the respective grant awards is attached.

## **GREEN COMMUNITY DESIGNATION PROCESS**

Municipalities are designated as "Green Communities" by satisfying 5 criteria spelled out in the legislation. The City has satisfied the first four of these requirements.

The purpose of this memo is to address the fifth and final criteria to be satisfied, Stretch Code Adoption.

The 5 criteria are:

CRITERIA #1: As of right zoning for renewable/alternative energy generation, research & development, or manufacturing facilities.

New Bedford has as-of-right zoning in place and thus satisfies this requirement.

CRITERIA #2: Expedited application and permit process for as-of-right energy facilities: 43D SITES

New Bedford has 6 sites that were approved 43D on April 9, 2008 and thus satisfies this requirement

CRITERIA #3: Energy Baseline / 20 percent energy reduction plan

New Bedford has updated its original 2010 reduction and thus satisfies this requirement

CRITERIA #4: Purchase only fuel efficient vehicles

New Bedford has updated its original 2010 vehicle plan and thus satisfies this requirement

CRITERIA #5: Minimize life-cycle costs (STRETCH CODE ADOPTION)

The stretch code must be adopted by general ordinance via City Council.

## **THE STRETCH CODE**

The Stretch Energy Code was added to the building code on July 24, 2009 and is located in the code as Appendix 115 AA. It uses provisions of the International Energy Conservation Code 2009 (IECC 2009) but provides a more energy efficient alternative to the standard energy provisions of the code that a municipality may adopt. To satisfy the 5<sup>th</sup> criteria of the Green Community Designation process, the Stretch Code must be adopted by general ordinance via City Council. Attached is the Stretch Code Ordinance and a description of the current code.

## New Stretch Energy Code Effective January 1, 2017

Massachusetts gives communities two options for their building energy code – a base energy code or an optional stretch energy code. Cities can choose to adopt the stretch energy code by City Council vote and it can be rescinded by City Council vote. Becoming a Green Community requires that the City Council adopt the Stretch Code.

On January 1, 2017, both the Base Energy Code as well as the Stretch Energy Code will be updated. The difference between the two will be much smaller than in the past. In fact, the new Stretch Code will be incorporated into the new Base Code, with no more extensive and separate language to describe it. The updated Stretch Code will apply to new commercial buildings over 100,000 square feet. However, smaller new commercial buildings or additions, renovation, and repairs to residential of commercial buildings are not impacted by the updated Stretch code.

A key feature of the Stretch Energy Code is that it is performance based. It requires new construction homes to meet a HERS (Home Energy Rating System) index rating target, rather than requiring the installation of specific levels of energy efficiency for each building element (e.g. Windows, Wall insulation, roof insulation, furnace etc.). The HERS rating is a measure based on a home's total expected energy use and overall efficiency. It is calculated by a certified HERS rater using accredited software, which uses information on the design of the energy systems in a home to calculate the annual energy needs of the home and give it a rating score.

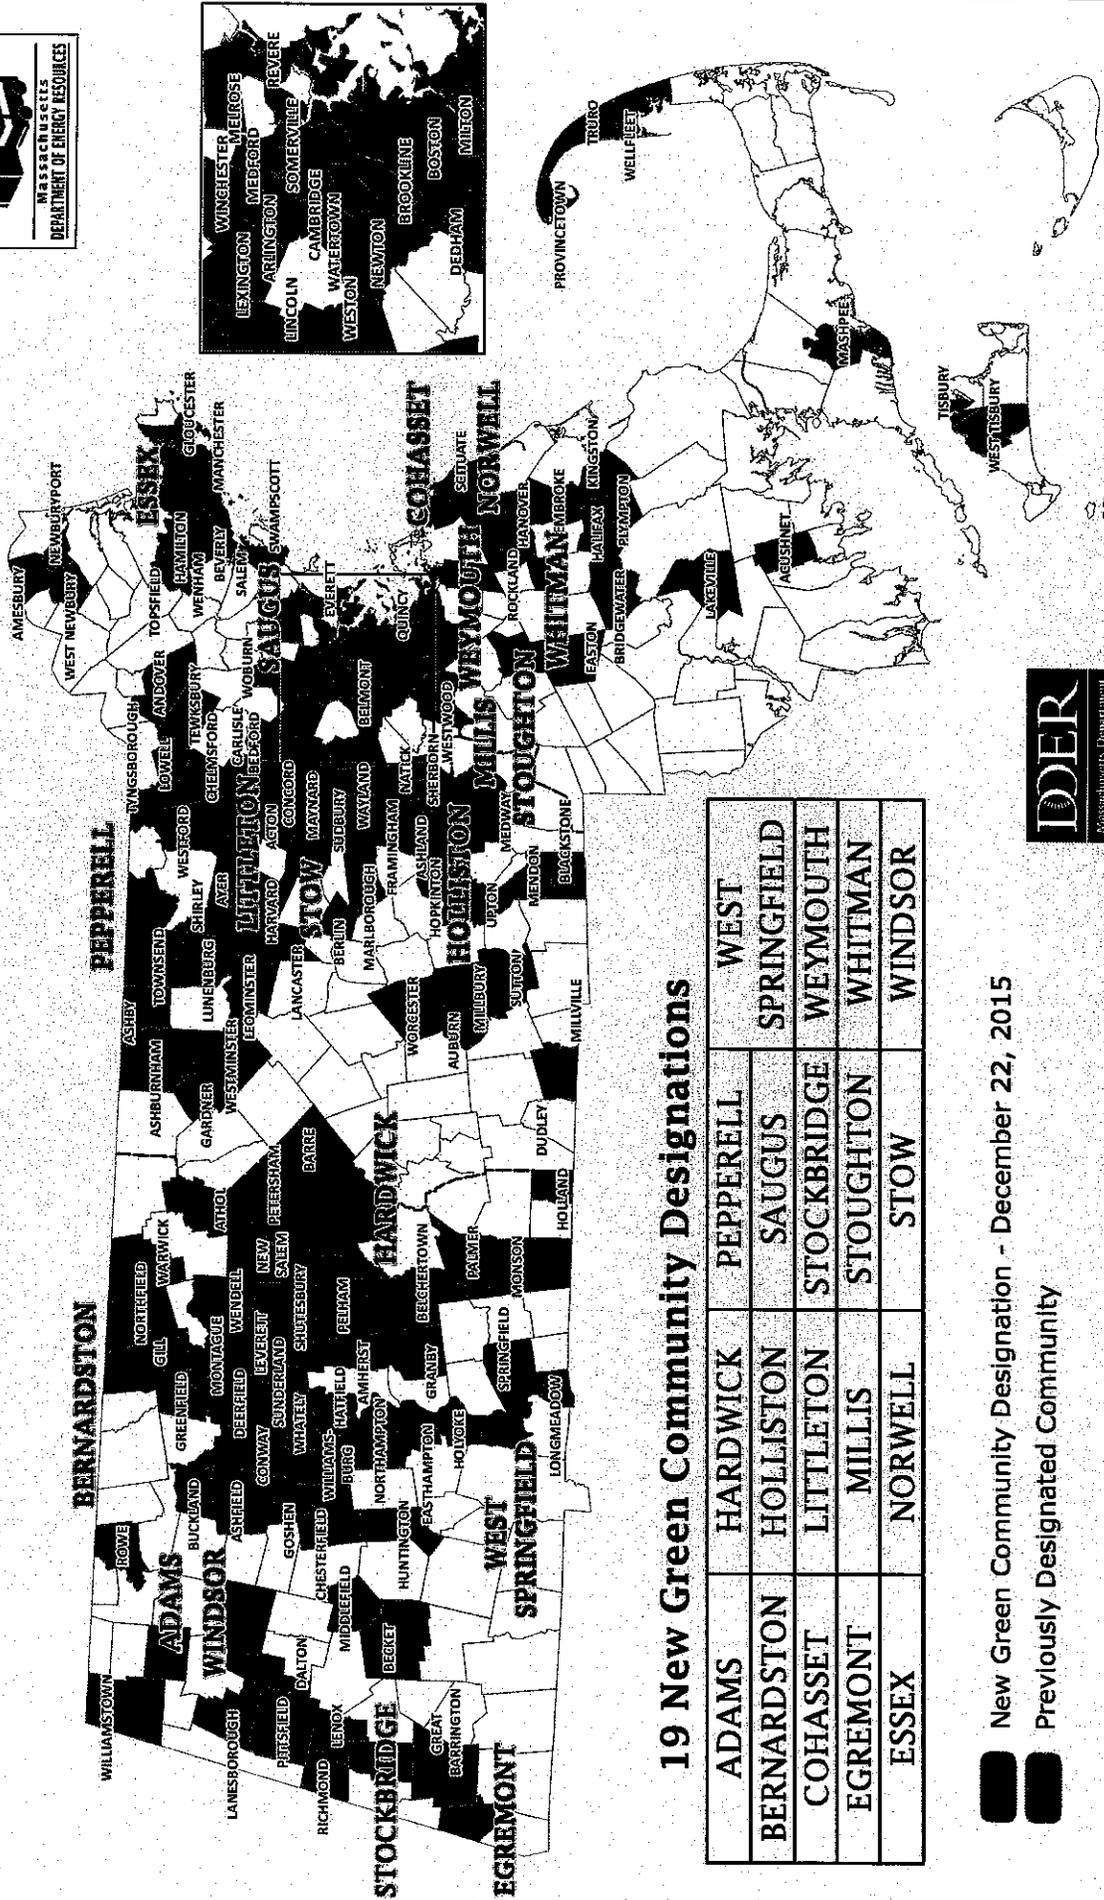

One benefit of using HERS ratings for compliance with the Stretch Energy Code is that builders do not have to install specific energy efficiency measures, rather they have the flexibility to choose which energy efficiency measures to install, and how to design the home in order to meet the HERS rating target. It is also a way to ensure that homes are well built. As part of the HERS rating, the HERS rater tests the home for air leakage and inspects insulation installation, which helps ensure that the home performs as designed.

Since the base energy code is updated approximately every 3 years, the Stretch Energy Code must be updated periodically in order to maintain the "stretch." The Board of Building Regulations and Standards (BBRS) and the Department of Energy Resources (DOER), two state entities responsible for the building energy codes, have completed work on a new stretch energy code. Basically, it would require that the performance path of the standard building code be followed in Stretch Code municipalities for new homes and for large new commercial buildings. When the new Stretch Code goes into effect, the additional cost will be primarily for the services of the HERS Rater. This is generally in the \$900 - \$1500 range for residences with a \$700 incentive available through the Mass Save Residential New Construction Program to offset the cost. There are also typically significant annual energy bill savings that more than tip the balance to give homeowners a net savings every year.

Once adopted, the stretch energy code would take effect on January 1, 2017. Currently 176 communities, representing more than half of the state's population, have adopted the Stretch Energy Code. Here is a link to information on the municipalities that have adopted the Stretch Code:

	July-16	\$144,731		to fund the following energy conservation measures: at the Middle School, Demand Control Ventilation upgrade and LED lighting retrofit; and at the Public Library, LED lighting retrofit		
	12/22/15	\$150,510		to fund purchase and installation of IdleRight technology in 2 town-owned and 1 to be leased vehicles; and implementation of approved energy conservation measures to be determined		
Hardwick	12/16/10	\$141,200		to fund the following energy conservation measures: demand control ventilation upgrades and building automation system upgrades at the Elementary School, energy efficient boiler replacements at the Fire and Police Stations, a deep energy retrofit analysis for Town Hall and VFDs, motor, and CO2 sensor upgrades at the public library.	X	2,997
	July-15	\$225,914		to fund project administration, building operator certification training, and the following energy conservation measures: at the Public Library, retro-commissioning and an interior LED lighting retrofit; at Bromfield School, an exterior LED lighting retrofit, lighting controls for hallways, and retro-commissioning (Bromfield/Hildreth School complex); for Hildreth Senior Center, installation of an efficient furnace; and exterior LED lighting retrofits at the DPW and Police Department		
Hatfield	12/16/10	\$130,725		to fund the following energy conservation measures: insulation and heating system upgrades at the Water Filtration Plant office, replacement of windows at Town Hall, installation of window gullis at Smith Academy, and purchase of an electric light duty truck for multiple department use.	X	3,282
	July-14	\$160,913		to fund energy conservation measures in the Elementary School, Smith Academy, Highway Garage, and Wastewater Treatment Plant	X	
Holland	7/19/11	\$143,250		to fund administrative costs and an energy audit to identify potential energy conservation measures in the Elementary and the following energy conservation measures: installation of an energy management system in the main building; and replacement of three classroom unit ventilators in the Elementary School	X	2,495
Holliston	12/22/15	\$147,445		to fund the following energy conservation measures: at the Fire Station, installation of programmable thermostats, air sealing and insulation, and installation of a new efficient gas fired boiler with an indirect water heater; at Town Hall, conversion to LED lighting with controls and air sealing and insulation; and at the Police Station, LED lighting with controls		14,162

		Designation Grant Award	Competitive Grant Award by Round			
155	July-12	\$28,781,573		to fund the purchase of a hybrid vehicle; a site evaluation for a solar PV system; an Energy Efficiency Manager position; and the following energy conservation measures: lighting upgrades at 355 Bolton Street, 215 Maple Street, 260 Boston Post Road, 104 Pleasant Street; vending miser controls, building performance optimization, upgrade the ventilation in the auditorium and large gym and small gym and library at 25 Union Street; vending miser controls, occupancy sensors and CO2 controls at 17 Washington Street; vending miser controls, a VFD air unit, and occupancy sensors at 520 Farm Road; boiler/burner replacement at 80 Foley Road.	102	3,611,499
	July-13	\$2,419,773			18	
	July-14	\$3,621,952			20	
	July-15	\$7,627,398			36	
	July-16	\$8,733,989			32	
Marlborough	12/16/10	\$217,125			X	39,414
	July-16	\$250,000		to fund the following energy conservation measures: at City Hall, installation of a new energy management system and installation of an energy efficient heat pump		
	5/25/10	\$170,124		to hire an engineering firm and fund energy efficiency measures in municipal buildings, high efficiency gas-fired boiler and heat pump replacements at the Police Station, and rooftop HVAC units at KC Coombs Elementary School.	X	
Mashpee	July-12	\$13,500		to fund administrative grant management costs and the following energy efficiency measures in municipal buildings: air sealing in Town Hall; insulating the Heating Ventilation and Air Conditioning and Domestic Hot Water pipes and sealing / insulating the exterior ductwork on the roof in the KC Coombs School; and installation of photo cell lighting controls at Mashpee High/Middle and KC Coombs schools	X	14,068
	July-15	\$163,537		to fund the following energy conservation measures at K. C. Coombs School: installation of new condensing HVAC boilers, new condensing domestic hot water heater, demand control ventilation in the gym, café, and library, new energy recovery ventilators for classroom wings, automatic daylighting control in the central library, and unoccupied temperature setbacks		
	12/20/11	\$160,025		to fund the following energy conservation measures: at Green Meadow School, installation of an energy management system; building envelope improvements; and a window A/C programmable thermostat; and at Fowler Middle School, an indoor and outdoor lighting retrofit.	X	
Maynard	July-14	\$100,245		to fund exterior lighting upgrades in two schools and seven municipal facilities and weatherization upgrades in Fowler School and the Police Station	X	10,370
	July-15	\$104,287		to fund an interior LED lighting retrofit at Fowler School; and a town wide streetlight LED conversion	X	
	July-16	\$246,792		to fund the following energy conservation measures: a town wide LED streetlight conversion; purchase of an electric vehicle and installation of an EV charging station; at Fowler Middle School, installation of an energy management system and duct static reset and LED lighting retrofit; at the Highway Barn, installation of infrared heating and LED lighting retrofit; and at the Fire Dept., repair of steam traps and valves		
Medford	5/25/10	\$271,651		to fund energy efficiency measures in school buildings and to update the municipal climate action plan	X	57,170
	July-12	\$250,000		to fund the following energy efficiency measures in the Chevalier Theatre: heating system replacement and conversion from oil to natural gas that included separation of domestic hot water system and insulation of steam lines; and a steam trap survey and repairs.	X	
	July-14	\$140,080		to fund administration costs and energy conservation measures in the five municipal facilities or schools	X	
	July-16	\$250,000		to fund costs of project management, building operator certification training, and the following energy conservation measures: interior and/or exterior LED lighting upgrades in six schools and one facility		

GREEN COMMUNITY DESIGNATIONS REACH 155

MA Green Communities	Designation Date / Award Date	Designation Grant Award	Competitive Grant Award by Round	Grant/Project Summary	100% Done	Census 2013 Population
155	July-12	\$28,781,573		to fund the following energy conservation measures: at Millbury Memorial Jr./Sr. High School, installation of occupancy motion sensors in bathrooms for lighting and exhaust fans, installation of ECM motors in unit ventilators and kitchen exhaust hood controls, retro-commissioning, installing ECM motors and evaporator fan controls in walk-in coolers, and replacing existing exterior lights with compatible LED fixtures; at the Elmwood Street and Shaw Middle Schools, installation of ECM motors and evaporator fan controls in walk-in coolers; at the Municipal Office Building, replacement of boiler reset control system, redesign of HVAC system, installation of vending machine misers, and a lighting upgrade; and exterior lighting upgrades for at the Municipal Office Building, Public Library, Asa Waters Mansion, and Town Common with LED technology.	102	3,611,499
	July-13	\$2,419,773			18	
	July-14	\$3,621,952	\$167,025		20	
	July-15	\$7,627,398	\$247,596		36	
	July-16	\$8,733,989	\$247,661		32	
Millbury	7/19/11	\$167,025			X	13,399
	July-14	\$247,596		to fund energy conservation measures in two schools and three municipal facilities	X	
	July-16	\$247,661		to fund the following energy conservation measures: a town wide LED streetlight conversion, purchase of four electric vehicles and installation of three EV charging stations; at Elmwood School, interior and exterior LED lighting retrofit and a high efficiency transformer; and at Millbury High School, an LED lighting retrofit		
Millis	12/22/15	\$151,325		to fund the installation of anti-idling devices and a town-wide LED streetlight conversion and the following energy conservation measures: building envelope improvements at Animal Control and Waste Water Treatment Facility/Well Pump House 5 & 6; refrigeration controls at the Middle/High School; exterior lighting upgrade at the Transfer Station, and well operation improvements for the water & sewer system		8,047
Millville	12/3/14	\$143,625		to fund administrative costs and public education, installation of idle reduction systems on a police cruiser, the incremental costs to purchase a hybrid vehicle for the Police Department, and the following energy conservation measures: exterior LED lighting retrofits at six municipal facilities, weatherization upgrades at three municipal buildings; walk-in EC motor controls at the elementary school; and roof insulation at the Fire Station		3,210
	12/16/10	\$157,100		to offset costs associated with the installation of a wind turbine on municipal land and the fund the following energy conservation measures: conversion of 36 decorative streetlights with LED technology; at the Police Station installation of insulated garage doors and installation of thermostats and setback controls on the boiler; at Town Hall installation of heating controls, replacing exterior doors, and upgrading interior lights; at Randolph and Granite Ave. sewer pump stations, installation of VFDs; at Pierce Middle School energy efficient lighting replacements; at Pierce Middle School upgrade of interior lighting; and at the Council of Aging installation of solar roof vents	X	27,270
Milton	July-15	\$235,605		to fund the following energy conservation measures: exterior lighting retrofits with LEDs at Cunningham/Collicot Elementary, Glover Elementary, Milton High, Tucker Elementary, Pierce Middle, and the Public Library; interior lighting retrofits with LEDs at Pierce Middle, Glover Elementary, Cunningham/Collicot Elementary, and Tucker Elementary; and installation of walk-in cooler/freezer controls at Pierce Middle, Cunningham/Collicot Elementary, Glover Elementary, Tucker Elementary, and Milton High schools	X	
	7/19/11	\$165,975		to fund an energy management system and upgrade to DDC at the Quarry Hill Elementary School and the incremental costs to purchase an energy efficient vehicle for the Senior Center.	X	
Monson	July-15	\$187,038		to fund the following energy conservation measures: at Quarry Hill Community School, fiberglass wrapping of exposed pipes, a lighting retrofit with LEDs, and installation of variable frequency drives; at Granite Valley Middle School, weatherization, fiberglass wrapping of exposed pipes, and a lighting retrofit with LEDs; at the Water & Sewer Building, weatherization and a lighting retrofit with LEDs; at Town Hall/Police Station, installation of plug load controllers; and lighting retrofits with LEDs at the Fire Station, Highway Garage, Senior Center, and Water & Sewer Building	X	8,722

	July-16	\$8,733,989			32	
		\$9,580,467		0		
Rowe	12/20/11	\$135,725		to fund the following energy conservation measures: at the DPW garage, an oil to wood pellet fuel heating system conversion and insulation and air sealing; at Town Hall, the Library, and Fire/Police Station, insulation and air sealing of the building envelope; and at the Library, an oil to electricity fuel conversion and installation of an air source heat pump for energy efficient streetlights, to buy down the cost of an energy service company contract, a residential weatherization pilot program and a bike sharing pilot program.	X	392
	July-15	\$154,776		to fund the following energy conservation measures: at the DPW garage, an oil to wood pellet fuel heating system conversion and insulation and air sealing; at Town Hall, the Library, and Fire/Police Station, insulation and air sealing of the building envelope; and at the Library, an oil to electricity fuel conversion and installation of an air source heat pump for energy efficient streetlights, to buy down the cost of an energy service company contract, a residential weatherization pilot program and a bike sharing pilot program.	X	
	5/25/10	\$245,624		to fund grant administration costs and the following energy conservation projects: retrocommissioning studies at 2 schools and 4 municipal facilities; a new Energy Management System and infrared heaters, building envelope improvements, and outdoor lighting at the DPW Headquarters and Garage; and outdoor LED shoebox lighting retrofit in the downtown.	X	42,544
Salem	July-13	\$223,769		to fund a complete city wide LED streetlight conversion	X	
	July-15	\$229,708		to fund administrative costs, purchase of two battery electric vehicles, installation of a Level 2 EV charging station and the following energy conservation measures: lighting upgrades at Veterans Memorial and Belmonte Middle Schools; commissioning analysis and improvements of HVAC system, and installation of variable frequency drives and efficient motors at Veterans Memorial Elementary School		27,735
Saugus	12/22/15	\$208,335		to fund energy conservation measures in several schools as part of a performance energy contract: building envelope improvements, water conservation measures, demand control ventilations, programmable thermostats, and exterior door replacements.	X	
	12/16/10	\$163,025		to fund installation of high efficiency transformers for the sewer pump stations	X	18,297
Scituate	July-14	\$89,304		to fund the following energy conservation measures: installation of efficient variable frequency drives on four water treatment or well pump motors; and at Jenkins School, installation of air handling unit motors and replacement of lighting fixtures		
	July-16	\$207,506		to fund anti-idling units for police and DPW vehicles and a high-level energy assessment of the Pine Hill School; and the following energy conservation measures: traffic signal conversion to LED technology; lighting upgrades at the Fire and Police Stations, Town Hall, and the Pine Hill School; building envelope improvements at the main Fire Station; and at the Library, conversion of the existing boiler from oil to gas.	X	4,239
Sherborn	7/19/11	\$137,450		to fund the following energy conservation measures at Pine Hill School: upgrades to air handlers in the library and gym; upgrades to unit ventilators in classrooms; and insulation and air sealing of the building envelope	X	
	July-15	\$77,800		to fund the installation of idle reduction units in municipal vehicles, technical assistance to evaluate implementation of a town-wide energy savings performance contract, purchase of streetlights and the following energy conservation measures: a LED streetlight pilot project; at the War Memorial, a lighting upgrade including occupancy sensors, building envelope improvements and replacement of the boiler and hot water heater.	X	7,613
Shirley	12/20/11	\$152,975		to fund a new direct expansion/air handling unit (AHU/DX) condensing unit		
	July-16	\$72,742				

GREEN COMMUNITY DESIGNATIONS REACH 155

		\$9,580,467		0		
Sutton	7/19/11	\$143,050		to fund an assessment of the feasibility of hydro at Stevens and Manchaug Dams; an energy audit to identify potential additional energy conservation measures at the Wastewater Treatment Plant, Sutton Senior Center and Fire Stations; and the following energy conservation measures: replacement of existing parking lot pole light heads with induction/LED fixtures; and, at the Municipal Complex, installation of a heat recovery system.	X	9,133
	July-14	\$169,797		to fund project administration costs and energy conservation measures in the Sutton Municipal and School Complexes	X	
	July-16	\$121,732		to fund the following energy conservation measures: at the Senior Center, a new efficient boiler and building insulation; at the School Complex, LED lighting retrofit and unit ventilator ECM motors; at Fire Station 2, building weatherization improvements and a new programmable thermostat; and new programmable thermostats at two facilities		
Swampscott	12/16/10	\$143,800		to fund the following energy conservation measures: high efficiency lighting retrofits and automatic lighting controls in the middle and high school, steam trap replacement in the elementary schools, and funding for a part-time Energy Manager.	X	13,951
	July-13	\$195,853		to fund the following energy conservation measures: building envelope improvements, weatherization and/or attic insulation in Clarke and Stanley Elementary Schools, Middle and High Schools, and the Fire Station; and in Clarke Elementary, steam trap replacement; and in the Public Library, replacement of HVAC equipment	X	
	July-15	\$225,000		to fund a complete town wide LED streetlight conversion		
Tewksbury	7/19/11	\$207,725		to fund staff training on energy management systems; a consultant to oversee grant implementation projects; and the following energy conservation measures: retro-commissioning in the Police Station, Wynn and Ryan schools; and a lighting retrofits at the Dewing, Ryan and Wynn Middle schools.	X	30,107
	July-14	\$157,826		to fund exterior lighting upgrades in four schools and four municipal facilities and weatherization upgrades in the DPW building and an outdoor air reset in Loella Dewing School	X	
	July-15	\$210,739		to fund the following energy conservation measures: at the Public Library, variable frequency drives on air handling units and exterior lighting retrofit; at the Food Pantry, installation of a unit heater and interior lighting retrofit; at the Senior Center, retro-commissioning; at Ryan Middle School, interior LED lighting retrofit and lighting controls; at South Fire Station, exterior LED lighting retrofit; and a interior LED lighting retrofit at the High School	X	
	July-16	\$187,201		to fund the following energy conservation measures: at the DPW, a new efficient unit heater; and at the Library, installation of new efficient hot water heating equipment		
	7/24/12	\$140,925		to fund administrative support and implementation of approved energy conservation measures identified from energy audits at the Department of Public Works, Senior Center, Police Department, Town Hall and Annex, Vineyard Haven Library, Tisbury School, Wastewater Treatment Plant, and Water Department.		
Topsfield	7/19/11	\$132,975		to fund building envelope weatherization at Proctor and Steward Elementary schools and four other municipal facilities, outdoor lighting retrofit program at Proctor and Steward Elementary schools, the Police, Fire, Library, and Department of Public Works buildings; ASHRAE Level 2 energy audits in same six buildings and Town Hall; indoor lighting retrofits at Proctor and Steward schools; and energy management system improvements, installation of VFDs and LED track lighting at the library.	X	6,388
	July-14	\$48,936		to fund a high efficiency steam boiler at the town library	X	
	July-15	\$36,418		to fund the following energy conservation measures: at Proctor Elementary School, the installation of a new domestic hot water condensing unit and improvements of the building envelope; and at Steward Elementary School, the installation of a new domestic hot water condensing unit

	July-14	\$250,000		to fund administrative costs, building envelope improvements, a oil to gas boiler conversion, and other energy conservation measures in eight schools and municipal facilities	X	
Wellfleet	12/3/14	\$140,000		to fund project management costs and the following energy conservation measures: in Town Hall, replacement of fan coil units with electronic commutative motors and an oil to propane heating system fuel conversion with new efficient boiler; at the Elementary School, DHW demand controller with mixing valve and variable frequency drives and efficient motors; and at the DPW Barn, a new heating system with infrared units for the large maintenance bay and installation of an efficient propane boiler; and implementation of approved energy conservation measures in municipal buildings to be determined		2,733
Wendell	12/13/12	\$138,875		to fund a Citizen's Energy Conservation Fund, purchase a thermal imaging camera, and ASHRAE Level II energy audits for the Senior Center, Police Department, Garage / Fire Station, Town Hall, Library, and Town Office; and implementation of approved energy conservation measures identified from the audits in the six buildings.		868
Wenham	5/25/10	\$138,974		to buy down the cost of an energy savings performance contract for implementation of energy conservation measures at the Town Hall, Fire Station, Police Station, Council on Aging and Public Library.	X	
	July-12	\$70,807		to fund the following energy efficiency measures in the Hamilton-Wenham Regional School District: motor and variable frequency drive (VFD) upgrades for four pumps; and kitchen ventilation controls at Buker, Cutler, and Winthrop elementary school buildings.	X	5,055
	July-14	\$245,603		to fund a town wide streetlight conversion to LED technology, and energy conservation measures in the Hamilton Wenham Regional Middle and High Schools, and four municipal facilities	X	
	July-16	\$249,950		to fund an upgrade of the Building Automation System at the Hamilton Wenham Regional High School / Miles River Middle School Complex		
West Newbury	12/18/13	\$140,900		to fund the following energy conservation measures: interior and exterior lighting efficiency retrofits of the 1910 Building, interior and exterior lighting efficiency retrofits of the Public Safety Complex, and a lighting efficiency retrofit of the G.A.R Memorial Library	X	4,437
West Springfield	12/22/15	\$222,765		to fund interior and exterior lighting upgrade at the Shaker Road Drinking Water Pumping and Treatment Facility; and implementation of approved energy conservation measures to be determined		28,684
West Tisbury	7/24/12	\$143,250		to fund the installation of idle reduction devices on two public safety vehicles, project management costs and the following energy conservation measures: at the Public Safety Building, high performance cooling equipment and infrared tube heaters (an oil to propane fuel conversion) for the truck bay; at Howes House, installation of an air source heat pump/cooling system (an oil to electric fuel conversion) and replacement windows; in Town Hall, installation of automatic daylighting controls; and in Fire Station 1, installation of an air source heat pump/cooling system (an oil to electric fuel conversion)		2,874
