RE: SEWER ABATEMENT REQUEST

Joseph Amaral
33 Bullard Street
Account # 1008492

Attached, for your review, is correspondence related to the above referenced sewer abatement request.

The circumstances associated with this request have been investigated by the Department of Public Infrastructure, Wastewater Division. As the result of the investigation, the water pressure relief valve broke causing water to pool on cellar floor. All excess water was absorbed into cellar floor and did not enter the collection system. I would recommend a credit in the amount of \$156.80.

Should you be in agreement, I would ask that you communicate the abatement recommendation to the City Council.

The water pressure valve was replaced on August 9th 2016.

For this reason, I kindly ask you to grant me an abatement for said time. Thank you for your consideration to this matter.
